Exam : **1z0-1043-21**

Title : Oracle Cloud Platform
Application Development
2021 Specialist

Vendor : Oracle

Version : DEMO

NO.1 You have deployed a Visual Builder Studio application and shared its URL with the enterprise. The enterprise gives feedback that the deployment is incorrect and does not meet their requirement specifications regarding the URL definition. Even though the application works as expected, they are insisting that you make corrections to meet their specified requirements.

What capabilities in Visual Builder Studio deployment activities would you use to meet this customer requirement?

- A.** Deploy the applications to display a version number or the word "ACTIVE" in the URL of the web application.
- B.** Undeploy the incorrect version of the application and then redeploy with a custom URL for the deployed application.
- C.** Deploy a new version of the application with corrections and have both versions available at the same time.
- D.** Set up the Visual Builder deployment to install the application on an on-premises server in the enterprise's data center.

Answer: D

NO.2 The SOAP protocol relies on XML messages. However, Oracle Mobile Hub APIs represent data as JSON internally. The Oracle Mobile Hub SOAP connector APIs use a translator to convert data back and forth between JSON and XML.

Which two statements are true about the translator?

- A.** It is recommended, but it is possible to bypass it if needed.
- B.** It offers a comprehensive mapping between JSON and XML, but some limitations exist.
- C.** It offers configurable mappings through XSLT.
- D.** It is mandatory because the SOAP connector APIs cannot bypass it.
- E.** It provides a perfect mapping between JSON and XML.

Answer: A,D

NO.3 Which three are important characteristics of Kubernetes Operators in OCI?

- A.** not good for hybrid cloud
- B.** systematize human knowledge as code
- C.** useful in multicloud environments
- D.** narrow Kubernetes functionalities
- E.** they are scalable, repeatable, and standardized

Answer: B,C,E

Explanation

NO.4 When you provision a WebLogic Server for OCI 12c JRF instance from Marketplace into a new environment, which OCI component is not provisioned?

- A.** Security List with all the security rules for ports required for WLS
- B.** Virtual Cloud Network(VCN)
- C.** Subnet for WebLogic and optional Load Balancer
- D.** Compartment

Answer: C

NO.5 You have used Oracle Developer Cloud to deploy the Docker image by pulling it from DockerHub on Container Engine for Kubernetes cluster. Which two commands can be used to get the external IP address?

- A.** \$ kubectl get cluster-info
- B.** \$ kubectl get pods
- C.** \$ kubectl get nodes
- D.** \$ kubectl get services

Answer: C,D

Explanation
