Exam : **1z0-1042-22**

Title : Oracle Cloud Platform
Application Integration 2022
Professional

Vendor : Oracle

Version : DEMO

NO.1 Which Process type should you choose to model non-sequential process type in Oracle Integration Cloud (OIC)?

- A. Dynamic process
- B. Structured Process
- C. Adaptive Case Management process
- D. Unstructured Process

Answer: A

Explanation:

<https://docs.oracle.com/en/cloud/paas/integration-cloud/user-processes/using-processes-oracle-integration-cloud.pdf>

NO.2 Which role is needed for managing users from Oracle Internet of Things (IoT) Cloud Service?

- A. System Administrator
- B. lotUsersGroup
- C. lotOperatorsGroup
- D. TotAdministratorsGroup

Answer: A

Reference:

<https://docs.oracle.com/en/cloud/paas/iot-cloud/iotsu/understanding-oracle-internet-things-cloud-service-user-roles.html>

NO.3 What are the three main features of Oracle Integration Cloud (OIC)?

- A. API management
- B. Internet of Things (IoT) application development
- C. Blockchain application development
- D. Application integration
- E. Business process automation
- F. Digital assistant application development
- G. Web and mobile application development

Answer: C,E,F

NO.4 When a connection is in edit mode and the browser crashes, the connection becomes locked, which then prevents it from being edited. Which two users can unlock the connection?

- A. a user with the Administrator Role
- B. a user with the Designer Role
- C. any user
- D. the same user who has edited the connection

Answer: A,D

Explanation:

<https://docs.oracle.com/en/cloud/paas/integration-cloud-service/icsug/creating-connections.html#GUID-085410CC-9BBE-4F4C-BEB7-8EDD1A9C7A1A> Unlocking a Connection When a connection is in edit mode and the browser crashes, the connection becomes locked, which prevents it from being edited.

To unlock the connection:

1. Log in again as the same user who was editing the connection when the browser crashed, then log out.

For example, if you were logged in as icsdeveloper when the browser crashed, log in again as icsdeveloper, and log out. This action unlocks the connection.

or

1. Log in as a user with the Administrators role.

2. On the Oracle Integration Cloud Service home page, click the Connections diagram.

3. For the connection that is locked, click the menu at the far right, then select Unlock.

NO.5 Which two statements are true about implementing an API-First strategy?

A. The code to execute business logic needs to exist and be exposed as an API first before you build a strategy around it.

B. You define the API definition/contract first before any work on its implementation or any applications that use it, allowing to work in parallel.

C. It generally is assumed that SOAP/WSDL are the key specifications for defining the API.

D. The API is to be developed first before any UI or new business logic are created.

Answer: C,D

NO.6 In Oracle Integration Cloud (OIC) Process, you can configure a human task that enable you to model approval task interactions.

What are the available options when configuring the Escalation and Expiration tab of human task?

A. Expire, Escalate, Skip, Reset

B. Never Expire, Expire, Renew, Escalate

C. Expire, Reset, Escalate

D. Never Expire, Expire, Never Escalate, Escalate

Answer: B

NO.7 In Oracle Integration Cloud (OIC) Process, you create web forms to interact with end users. As part of creating a web form, you add its controls, configure its data, and define form behavior Which statement is true about creating web forms?

A. You can assign one or more stylesheets and one or more presentations to a webform

B. You can assign one or more stylesheets and only one presentation to a webform

C. You can assign only one style sheet and only one presentations to a web form

D. You can assign only one style sheet and one or more presentations to a web form

Answer: D

Explanation:

<https://docs.oracle.com/en/cloud/paas/integration-cloud/user-processes/ready-create-web-form.html#GUID-F758085B-2F12-44BD-9E6C-47C6FD99A820>

NO.8 You have a single synchronous integration flow updating systems with several external invocations within multiple loops. Several client applications are experiencing blocking timeouts waiting for confirmation of the complex processing logic.

Which is a legitimate strategy to mitigate this issue?

- A. Change the implementation logic to invoke multiple fine-grained external API calls within a single loop.
- B. Increase the blocking timeout within the OIC integration settings to allow for extended time.
- C. Split into smaller integration flows that can be orchestrated sequentially from a master synchronous flow.
- D. Change to an asynchronous flow that provides a notification when processing is complete.

Answer: A

NO.9 Which type of certificate requires the uploading of a keystore(.jks) file in Oracle Integration Cloud to facilitate two-way SSL communication with external services?

- A. Trust Certificate
- B. Unified Communication Certificate
- C. Multi Domain Certificate
- D. Message Protection Certificate
- E. Identity Certificate

Answer: E

NO.10 What are the correct steps involved in Business process creation in Process Cloud Service?

- A. Perform WSDL configuration, XML message definition and web page design
- B. Visio (vdx), BPMN 2.0 (bpmn) and XPD 2.x (xpd)
- C. Create an Abstract, Design Services, Set up Notify, Configure Send and Receive and Decisions
- D. Create a process; assign roles to the process; Design the flow; Configure flow element properties; Define the data and then Associate the data

Answer: D

Explanation:

<https://docs.oracle.com/en/cloud/paas/process-cloud/user/creating-business-process.html#GUID-DE37452E-E16D-4071-9AA3-CBC9B6DBC617>
