Exam : **1z0-1110-23**

Title : Oracle Cloud Infrastructure
Data Science 2023
Professional

Vendor : Oracle

Version : DEMO

NO.1 You are a data scientist working for a utilities company. You have developed an algorithm that detects anomalies from a utility reader in the grid. The size of the model artifact is about 2 GB, and you are trying to store it in the model catalog. Which three interfaces could you use to save the model artifact into the model catalog?

- A. OCI Python SDK
- B. ODSC CLI
- C. Accelerated Data Science (ADS) Software Development Kit (SDK)
- D. Git CLI
- E. Console
- F. Oracle Cloud Infrastructure (OCI) Command Line Interface (CLI)

Answer: A,C,F

NO.2 Select two reasons why it is important to rotate encryption keys when using Oracle Cloud Infrastructure (OCI) Vault to store credentials or other secrets.

- A. Key rotation reduces risk if a key is ever compromised.
- B. Periodically rotating keys make it easier to reuse keys.
- C. Periodically rotating keys limits the amount of data encrypted by one key version.
- D. Key rotation allows you to encrypt no more than five keys at a time.
- E. Key rotation improves encryption efficiency.

Answer: A,C

NO.3 3. When preparing your model artifact to save it to the Oracle Cloud Infrastructure (OCI) Data Science model catalog, you create a score.py file. What is the purpose of the score.py file?

- A. Define the compute scaling strategy.
- B. Define the inference server dependencies
- C. Execute the inference logic code.
- D. Configure the deployment infrastructure.

Answer: C

NO.4 You are a data scientist trying to load data into your notebook session. You understand that Accelerated Data Science (ADS) SDK supports loading various data formats. Which of the following THREE are ADS supported data formats?

- A. DOCX
- B. Raw Images
- C. JSON
- D. Pandas DataFrame
- E. XML

Answer: C,D,E

NO.5 What preparation steps are required to access an Oracle AI service SDK from a Data Science notebook session?

- A. Import the REST API.
- B. Create and upload the API signing key and config file.

- C. Create and upload score.py and runtime.yaml.
- D. Call the ADS command to enable AI integration

Answer: B

NO.6 For your next data science project, you need access to public geospatial images. Which Oracle Cloud service provides free access to those images?

- A. Oracle Analytics Cloud
- B. Oracle Big Data Service
- C. Oracle Cloud Infrastructure Data Science
- D. Oracle Open Data

Answer: D

NO.7 In the Oracle Cloud Infrastructure (OCI) Data Science service, how does Model Catalog help with model deployment and management in MLOps?

- A. It helps to package the model and its dependencies into a lightweight, portable container.
- B. It helps to automate the feature engineering process.
- C. It is a database that stores all the features used in a machine learning model.
- D. It provides a centralized and scalable way to manage models and their metadata.

Answer: D

NO.8 You train a model to predict housing prices for your city. Which two metrics from the Accelerated Data Science (ADS) ADSEvaluator class can you use to evaluate the regression model?

- A. Explained Variance Score
- B. Weighted Recall
- C. F-1 Score
- D. Weighted Precision
- E. Mean Absolute Error

Answer: A,B
